SS101: An Introduction to Syndromic Surveillance

Free CME Accredited Online Training Program Now Available

The International Society for Disease Surveillance, in partnership with the Tufts University School of Medicine and Tufts Health Care Institute, has created an online course in syndromic surveillance.

This program is designed to increase knowledge and foster collaboration between public health and clinical practitioners new to syndromic surveillance.

This training, which has been approved for *AMA PRA Category 1 Credit™*, is divided into four one-hour, self-paced modules and is available at no cost. Contact hours will be awarded for nurses.

Module 1: Syndromic Surveillance Definitions, Uses, Data Types, and Syndrome Groupings

Module 2: Evaluation of Syndromic Surveillance Data Systems, and Data Analysis

Module 3: Response Algorithms, Data Display, and Websites

Module 4: Strengths and Limitations of Syndromic Surveillance: Privacy, Confidentiality and HIPAA, and the Clinician's Role

www.syndromic.org/resources/training/SS101

The development of these online modules and their accreditation was funded by the National Association of County and City Health Officials (NACCHO).
